

## The contents of the habitat SSCO file package (how to read)

Version May2024 – final revision is being done

|               |   |
|---------------|---|
| Main document | Overall review, methodology, summary of results   |
| Annex 1       | Habitat SSCOs (this .xlsx table) with target areas and target condition for each habitat type in each Natura 2000 site unless they are insignificant  |
| Annex 2       | Geospatial information (.shp layers): the current areas for Annex I habitat types in each Natura 2000 site, at 2024/02/01, and potential habitat area (both together form the target area)  |
| Annex 3       | Expert considerations on setting target areas for each habitat type in each site (if they are not site-specific, more detailed information in the main text (report). Quantified target areas and target condition – in Annex 1, here only expert considerations. |
| Annex 4       | Assessments of current habitat condition (using data from 2023), the algorithms and descriptions of methodology.  |
